

Scotch Eggs

Method

1. Put 9 eggs into a large saucepan. Cover with cold water and bring to the boil. Once boiling, set the timer for 5 mins. When 5 mins is up, quickly lift the eggs out with a mesh skimmer and put them into a big bowl of cold water.
2. Put the sausagemeat, parsley, mustard powder and nutmeg into a bowl with plenty of seasoning. Break in 1 of the remaining eggs and mix everything together.
3. Crack the remaining 2 eggs into a bowl, beat with a fork, then pour onto a plate. Tip the flour onto another plate and season well. Finally, tip the breadcrumbs onto a third plate.
4. Bring a large saucepan of water to the boil. Drop in the bacon rashers, turn off the pan and fish out the bacon with two forks – it should be just cooked.
5. When the eggs are cool, peel them lightly. If you hold the eggs over the bowl of water as you peel, all the shell bits will collect in there and you can dip in the egg to wash off any fragments. Wrap a slice of bacon around the middle of each egg, like a belt.
6. Now finish wrapping the eggs. Set up the ingredients along your bench like a conveyer belt: eggs, then flour, mixture, beaten egg and finally breadcrumbs, plus a baking tray at the end to put the finished scotch eggs on.
7. Roll your bacon-wrapped eggs in the flour, shaking off excess. Take a good chunk of mince and pat out to thinly cover one hand. Sit the egg on the meat, then mould over the mince to cover. Dip in the egg, shaking off the excess, then roll in the breadcrumbs to coat, and transfer to your tray. Repeat to cover all 9 eggs, then cover with cling film and chill for 4 hrs or overnight.
8. To cook, pour the oil in a large, deep saucepan to about 4cm deep. Heat until a small chunk of bread browns in about 1 min. Carefully lower in a scotch egg and fry for about 5 mins, turning gently, until evenly browned. Depending on your pan, you can probably do 2-3 at a time, but don't overcrowd. Lift out onto a kitchen paper-lined tray. (If you like your scotch eggs warm, pop them into a low oven while you fry the rest.) keep an eye on the oil – if the scotch eggs start browning too quickly, the oil might be too hot and you risk the pork not being cooked before the scotch egg is browned. If the oil gets too cool, the scotch egg may overcook before it is browned. enjoy warm or cold; best eaten within 24 hrs of frying.
